## ABOUT US

DMW is one of the leading manufacturers of challenging toolsets for different systems of CNC punch presses since more than 30 years. From our head office in Geiersthal in the Southeast of Germany, we provide tools for a huge number of customers who are based all over the world. We plan, develop and produce challenging tools, always focusing on the goal which has always been our strength: be a qualified, innovative and a reliable partner for the sheet metal industry.

We are  
certified  
after  
DIN EN  
9001:2008.

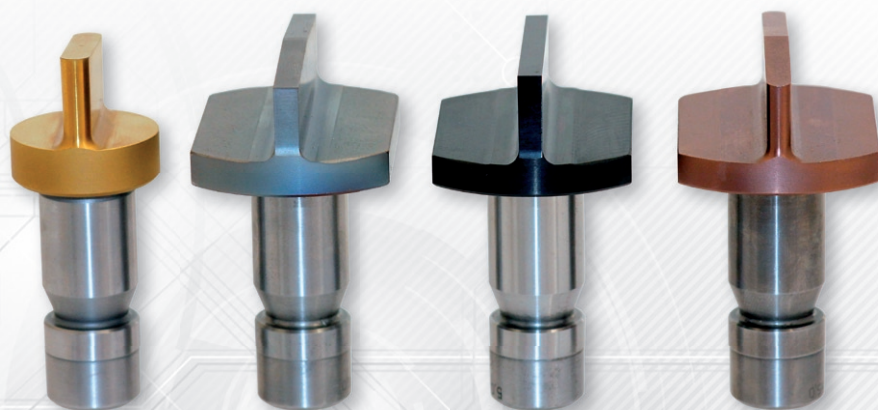

## TRUMPF

Since more than 20 years we manufacture tools for the Trumpf Tool System. The advancement of those machines also has increased the possibilities in the field of sheet metal working. Our experienced sales team awaits your challenges to find the ideal tool solutions for your issues. Today the DMW Trumpf Tool System Catalogue contains along the classic Standard Tools a huge product range of Special, Cluster - and Forming tooling and many different customized solutions including specially patented systems.

## COATINGS

The tool life is the most critical aspect for customers. With our longstanding experience we help you to find the optimal coating for your material which increases performance and durability of your tools. We deliver a numerous selection of different coatings that is modulated to your specific sheet metal.

	System	Trumpf	Boschert	Amada	Primapower	LVD	Euromac	Durma	Rainer	Pivatic	Raskin	Behrens

## THICK TURRET

Please also test our great product range of Special and Forming Tools for the Turret Tool System.

Allround 2005 and Allround 2000 is the DMW tool system for Thick Turret punching machines. All of these tools are delivered with our approved Airblow-System.

**Our patented system, Allround 2005, offers following advantages:**

- Fast change of tool length with button on the guide (steps of 0.2 mm)
- Tool delivery with closed guide or guide with changeable stripper
- All tools are available as guided version
- Quick change of punch and stripper without using a screwdriver (see attached tutorial)

1.) Unlock

2.) Remove Guide

3.) Unscrew Punch

4.) Change Stripper Plate
